# Key Modules

## Security & User Control

- Single Sign-On (SSO) and reCAPTCHA protection
- Role-based permissions with quick user cloning
- Full auditability across actions and data

# Key Modules

## Assets Management

### Locations & Territories:

Create and categorize locations with address + lat/long, business hours, territories, and offices; view everything on an interactive map.

### Branches:

Register branch contacts, link locations, and manage responsibilities at a glance

### Vehicles:

Assign transportation roles (e.g., single/dual trailer compatibility), track asset status, and tie vehicles to tanks/locations.

### Licenses & Certifications:

Define required certifications/skill levels; enforce driver/location requirements for compliance and access.

### Vendors & Contacts:

Manage vendor records (accounts, head offices, payment addresses) and assign contacts across customers, locations, vendors, and branches.

### Map-first oversight:

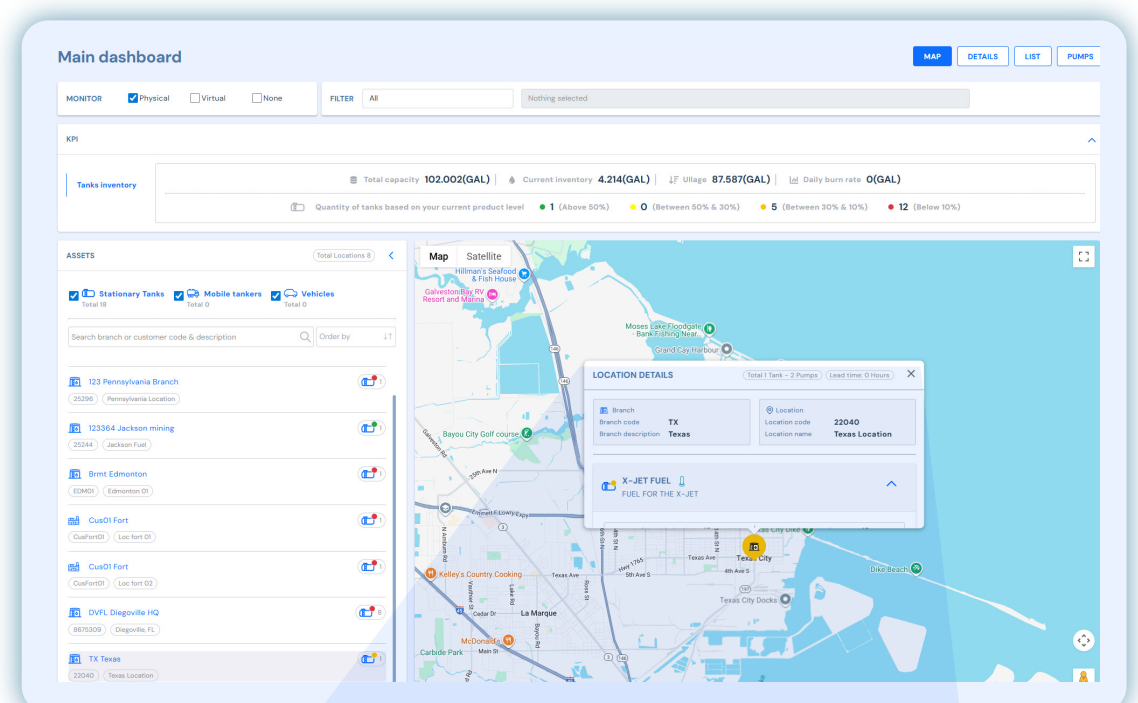

Visualize all internal/external assets with status colors and smart clustering.

# Key Modules

## Dashboard & KPIs

- Single view for tanks, vehicles, mobile tankers, and locations
- KPIs for capacity, current inventory, ullage, 7-day burn rate, and status alerts
- Interactive map with asset grouping and drill-down detail

## Tank Management

- Real-time product, water, and temperature monitoring
- Multi-compartment setup with safe fill/min levels & calibration tables
- Virtual LevelShield for sensor-offline level simulation
- Criticality views and runout prevention dashboards

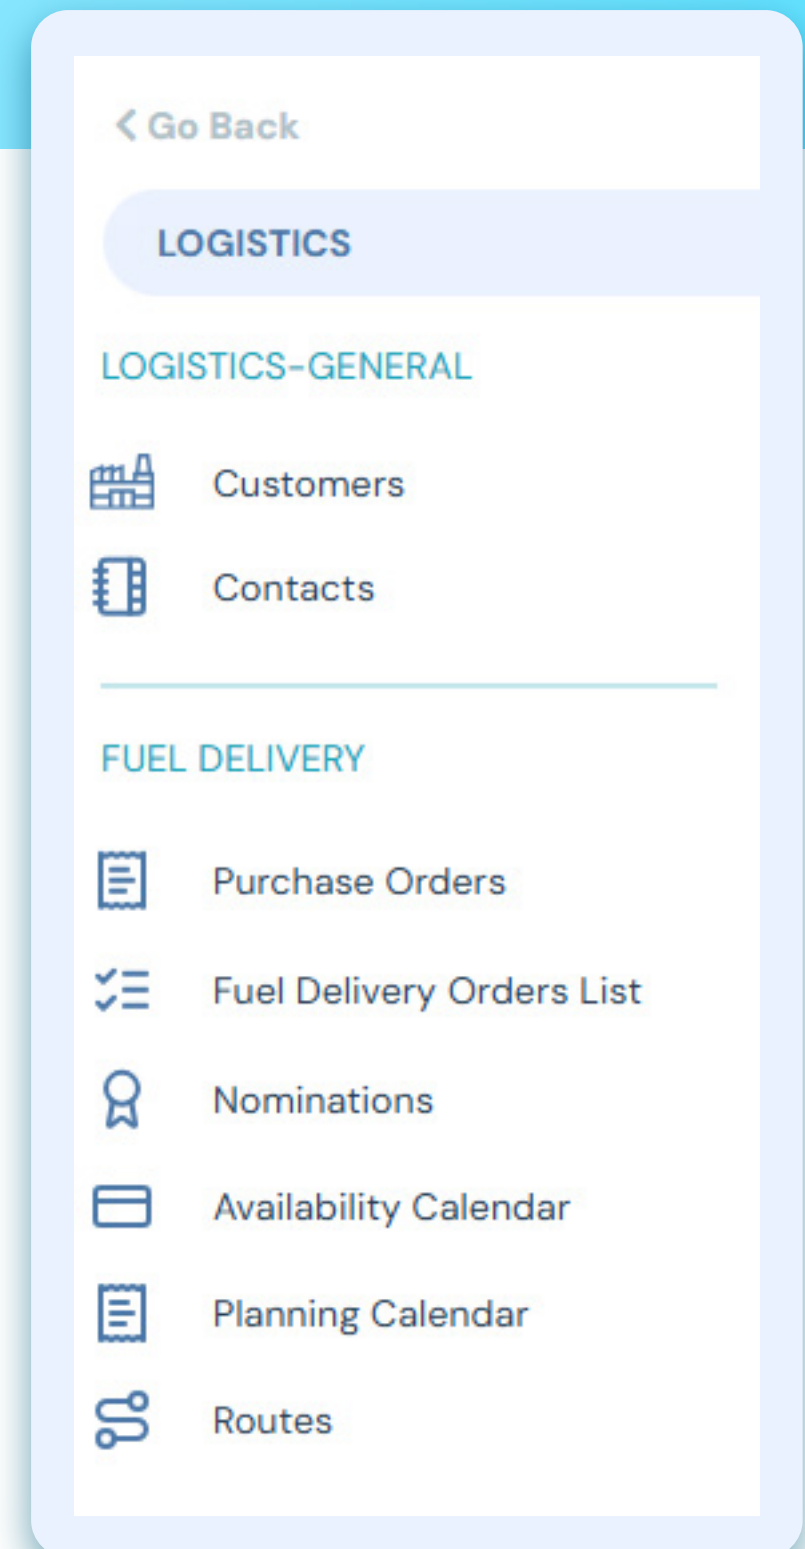

# Key Modules

## Logistics & Fuel Delivery

- Calendar-based **Orders Scheduler** (fleet, trips, drivers, origins/destinations)
- Streamlined Order Management with filters and Excel export
- Purchase Orders, Customer Insights, **Nominations** (goal vs. planned vs. actual)
- **Availability Calendar** for vehicles, tanks, and drivers

## Reporting & Analytics

- Powerful filters (date/time, vehicle, driver, pump, location)
- Save personalized views; mark favorites; export to Excel
- Scheduled reports (daily/weekly/monthly) via email

# Key Modules

## Fuel Management

- Bulk authorization of permission codes by pump/driver/vehicle
- Real-time transaction capture & reconciliation
- Deep integration with **FuelShield®** and **LevelShield®**

# Why **FUEL34**<sup>®</sup>

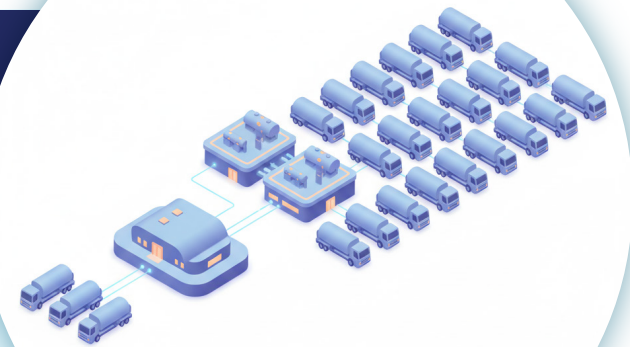

## **Real-time sync**

Tanks, trips, transactions, all captured automatically

## **Scalable**

From small fleets to multi-terminal distributors

## **Configurable & white-label**

Align to your workflows and brand

## **Secure**

SSO, reCAPTCHA, roles, and audit trails

## **Actionable:**

KPIs, alerts, and scheduled reports drive decisions

# Applications

## Distributors & terminals

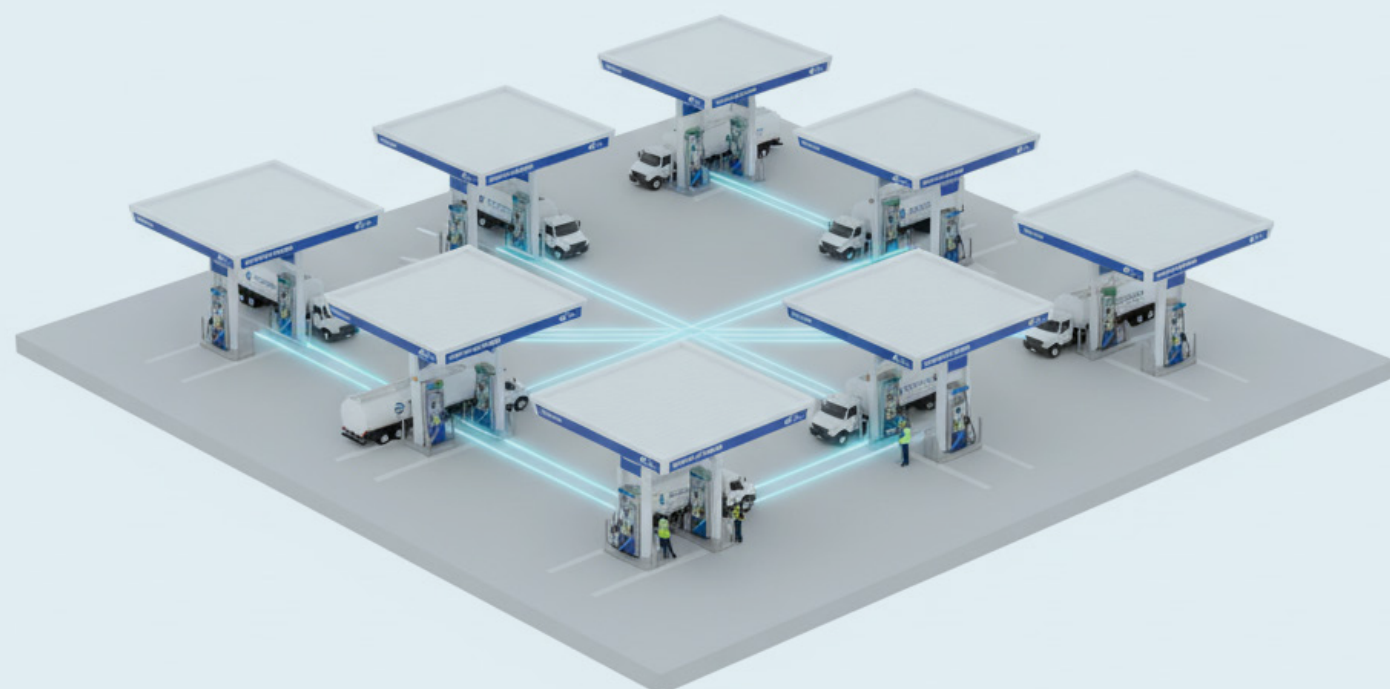

## Fleets (private fueling)

## Mobile tankers

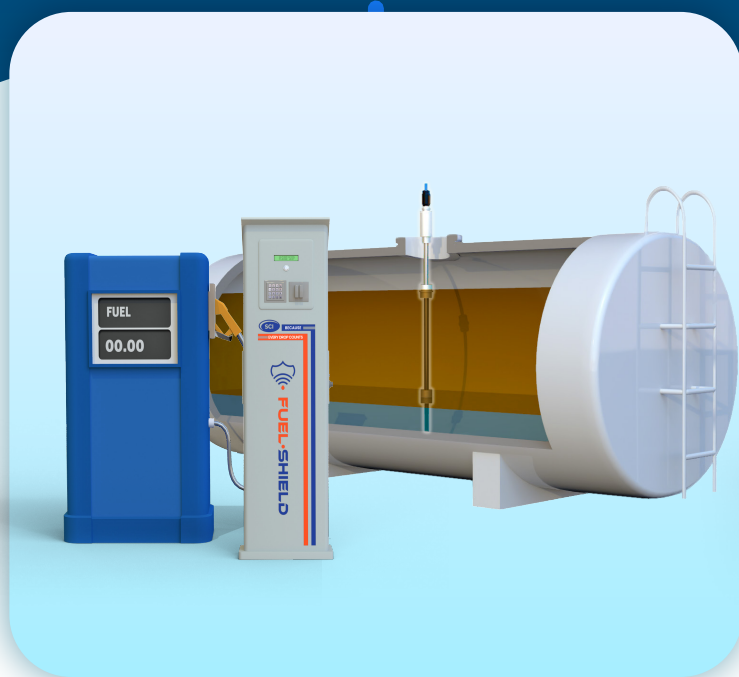

## Multi-site operations

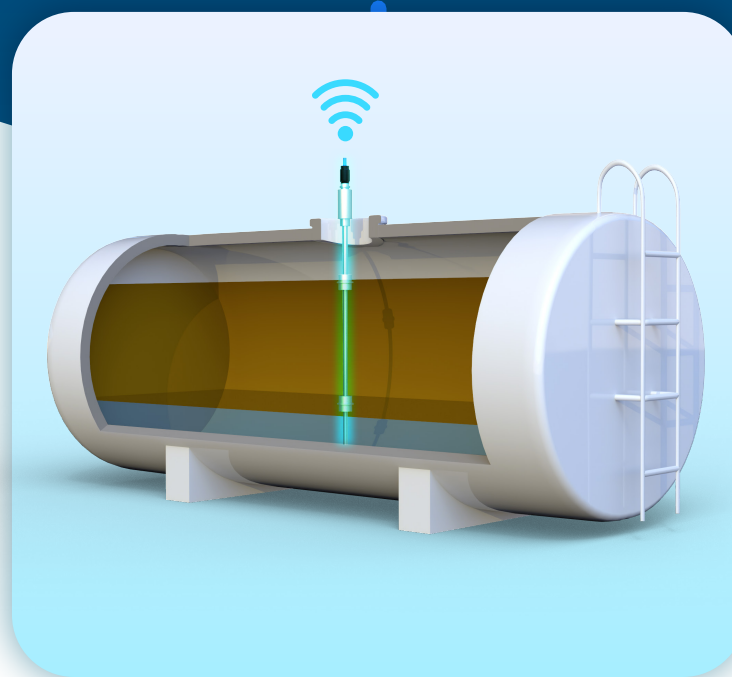

# Seamless Integration Across Systems

**FUEL34®** isn't just a standalone platform, it's the **central hub** that connects every part of your fuel management operation.

Syncs all fueling transactions for secure, authorized dispensing.

Feeds real-time tank monitoring data directly into your dashboards.

**Third-Party Systems**

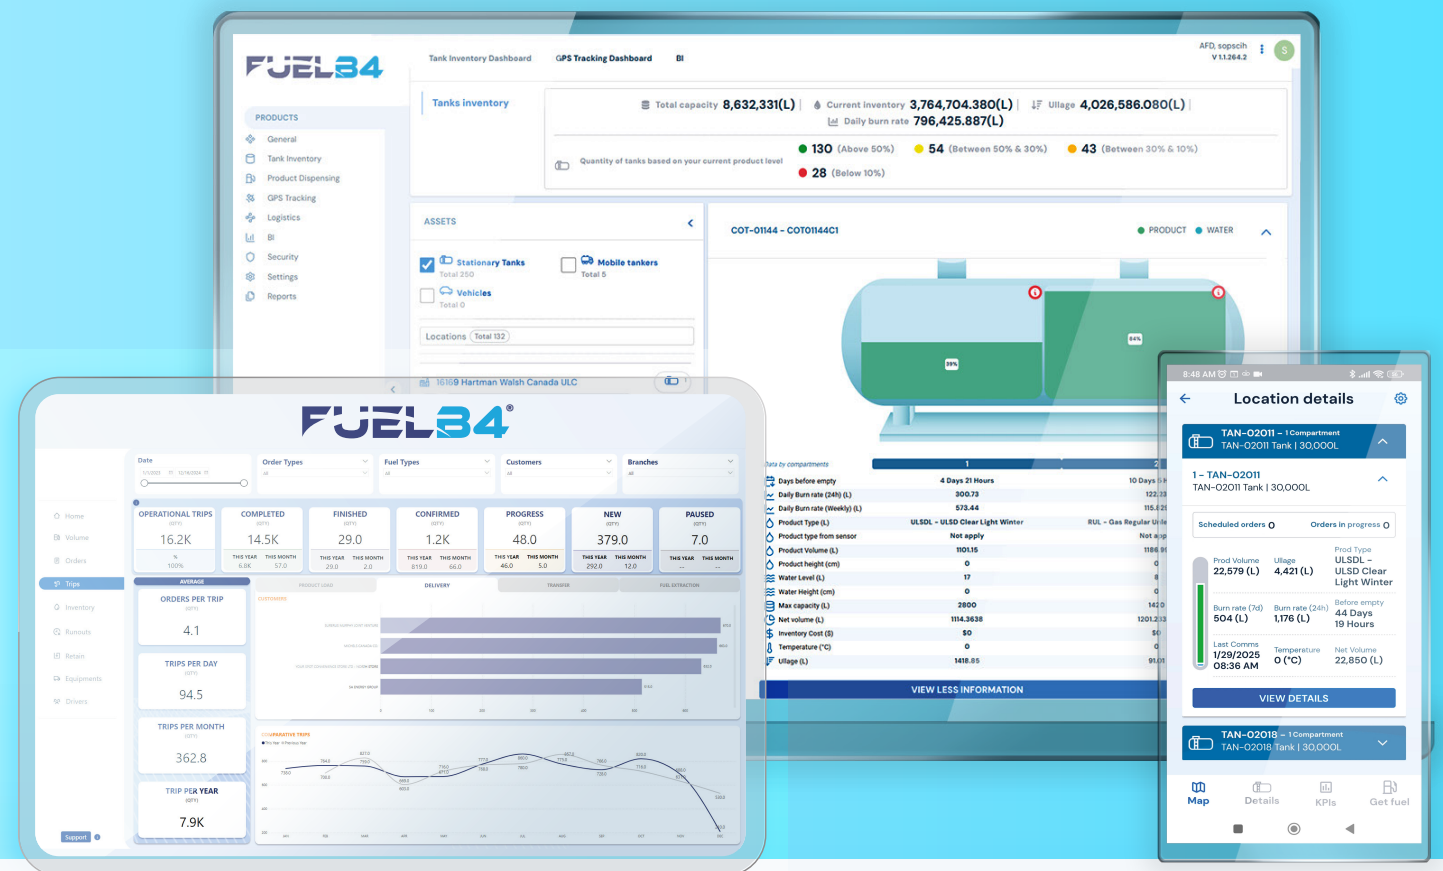

Compatible with external level monitoring, ERP, and accounting platforms for full data harmonization.

**FUEL34®** unifies the data for a single source of truth, helping you prevent errors, streamline operations, and make confident, data-driven decisions.

**FuelB4®** gives you complete oversight of every drop of fuel. White-label it for your clients or leverage it to transform your own operations, all while staying seamlessly connected to your hardware and third-party systems.
