About **FUELSHIELD®** | Resale

Selling fuel to third parties requires
accuracy, compliance, and trust.

FuelShield® Resale provides secure authorization and automated reconciliation for every transaction, whether at a retail station, distributor terminal, or mobile tanker configured for resale.

All fueling data is instantly captured and synced with **FuelB4®** software, ensuring transparent reporting, fast reconciliation, and simplified accounting.

Because Every Drop Counts

www.sciww.com

How It Works

1

Customer requests fueling.

2

FuelShield® validates authorization via card, wallet, or secure ID.

3

Pump activates only if approved.

4

FuelB4® records every detail in real time.

Authorization Methods

Resale Operations

Payment Cards (WEX, EFS, Debit/Credit)

Accept major fleet cards and standard payment cards. Perfect for mobile tankers and retail stations.

NFC / Virtual Wallets

Enable fast contactless payments with mobile wallets or smart cards.

QR Codes

Enable fast contactless payments with mobile wallets or smart cards.

Magnetic Stripe / Swipe Cards

Works with corporate cards and POS systems.

RFID Tags

Streamline transactions for fleets with pre-registered vehicles.

Keypad / PIN

Add driver ID verification for secure fleet sales.

Applications

Retail fuel stations (single or multi-location)

Distributor terminals selling to external fleets

Mobile tankers configured for resale (payment cards or NFC)

Key Benefits

- ✓ Acceptance of major fleet cards (WEX, EFS)
- ✓ Supports retail POS and mobile payment environments
- ✓ Prevents unauthorized fueling and reduces fraud
- ✓ Instant **FuelB4®** sync for billing & reporting
- ✓ Flexible setup: retail, wholesale, or mobile resale

FuelShield® Resale gives you the tools
to sell fuel securely, reconcile
transactions instantly, and grow your
business with confidence
